Dear Hiring Team at AMITKK,

I am writing to apply for the **React & Node Internship** at AMITKK. I am a Computer Science student with strong interest and hands-on experience in modern web development, particularly using **React, Node.js, JavaScript, and Tailwind CSS**. I am enthusiastic about building scalable, user-focused digital solutions and contributing to real-world projects.

During my academic journey and personal development work, I have built responsive web interfaces, worked with component-based architectures, integrated REST APIs, and focused on clean UI/UX practices. I enjoy solving problems through code and continuously improving performance, usability, and maintainability of applications. These experiences have helped me develop a strong foundation in frontend development along with a growing understanding of backend workflows.

I am particularly interested in AMITKK because of its focus on digital innovation, marketing-driven technology solutions, and practical exposure to real client projects. Working in a fast-growing and purpose-driven environment like yours strongly aligns with my career goals, where I can learn from experienced professionals while contributing value through my technical skills and dedication.

I am a quick learner, adaptable, and highly motivated to take ownership of tasks assigned to me. I am confident that this internship will help me further enhance my technical abilities while allowing me to support AMITKK's mission of delivering impactful digital solutions to its clients.

Thank you for taking the time to review my application. I would welcome the opportunity to discuss how my skills, enthusiasm, and commitment can contribute to your team. I look forward to hearing from you.

Sincerely,

Shubham Dubey
